CPS Photoshop Digital Editing Course

What Our Students Say:

CPS's Digital Editing Class gave me an excellent introduction to a very comprehensive computer program that I could never have accomplished on my own. The instruction was user friendly and ease of interaction among other students and the instructors helped my understanding of the material. John M.

These friendly and humorous experts can teach you in a short time what it took them a lifetime to learn the hard way. Dr. Jim

I would recommend the CPS Digital Photo Editing Class to anyone interested. Before I took the class I didn't know too much on how to properly edit a photo. Now that I completed the classes, I feel comfortable in editing my photos now. Troy V

The Digital Editing Classes are worth your time, money and so much more. As a collaborated effort from the experienced members of CPS are willing to help you enhance your photos with Photoshop. I had purchased Photoshop and I had no clue what I was doing, and when I did it, I didn't know what I did to get there. After taking these classes I now have a basic understanding of the concepts. I actually am having fun trying different things to my photos. Another plus about the CPS classes is, if you don't understand the material, you can attend a future class when it's offered. Karen H.

I was frustrated trying to use the tools in Adobe Photoshop Elements to improve my digital images. The CPS Digital Photo Editing Class explained the tools step by step, giving me a CD with the images demonstrated in class to practice on during the week. The staff was helpful in answering my questions and helping me get the results I wanted. Michael C.

I would highly recommend this class for anyone who wants to take their photography to the next level. Instructors are great and have a way of teaching that makes everything come together in that "wow - I did not realize it was that easy"!!
Joanne D.
